

**The WESTERN SOCIETY OF NATURALISTS announces  
a call for proposals to**

**The Rafe Sagarin Fund for Innovative Ecology**

The Western Society of Naturalists is pleased to announce a new funding opportunity to support innovative research projects in ecology. The Rafe Sagarin Fund seeks to support graduate students and post-doctoral researchers who conduct creative research that includes a strong component of observational ecology. The fund was created to encourage students and post-doctoral researchers to “think outside the box” in developing and applying observational approaches to address important ecological and societal questions.

Rafe Sagarin’s research interests were incredibly broad, and proposals are invited from a similar breadth of disciplines and approaches. Rafe championed the importance of rediscovering natural history, and applications are encouraged from students whose research is grounded solidly in the natural history of marine, freshwater, or terrestrial organisms. Since Rafe’s conception of observational ecology encompassed more than traditional natural history, the fund especially invites proposals for **interdisciplinary inquiry** that integrate **natural history** in **creative** ways with one or more of the following:

- historical data, including that gathered from unconventional sources
- social sciences
- remote sensing, remote video, and other technologies
- education and public outreach
- citizen science

- molecular tools
- the arts

You can learn more about Rafe's work at:

<http://www.rafeinnovativeecologyfund.org>

Overall, the fund seeks to build on Rafe's legacy by supporting graduate student and postdoctoral research to address important ecological and/or societal questions through **observational approaches applied in novel, creative, and (last, but not least) fun ways.**

Funds are available for actual research costs, such as salaries, field and laboratory equipment, consumable supplies, computer time, usage fees, and research travel.

The primary intent of the fund is to catalyze new research, rather than to pay for work that has already been conducted.

**ELIGIBILITY:** Applicant must be a full time graduate student enrolled in a formal degree program or a postdoctoral scholar at an accredited university. There are no citizenship restrictions and students from all countries are eligible.

Previous award winners are ineligible.

Membership in the Western Society of Naturalists is required during the year of application (graduate students receive a discounted rate of \$5/year).

**AWARD:** At least one award of up to \$2,500 US is available to support research to begin within the year following the WSN meeting (in-progress research is also eligible). Award recipients are strongly encouraged to present their research findings at a subsequent WSN meeting and will be offered free registration to one meeting to facilitate sharing of their results.

Award winners will be required to submit a picture, short one-paragraph biography, and short one-paragraph project summary for posting on the WSN and Rafe Sagarin Fund websites *prior to receipt of the award monies.*

A written 1–2 page report for a general audience is required one year after award receipt. Videos or other creative products are also strongly encouraged.

### **PROPOSAL REQUIREMENTS:**

1. Cover page with the following information: proposal title, applicant name, affiliation, mailing address, email address, and phone number. Include a listing of no more than FIVE keywords that describe the proposed research.
2. The proposal must explicitly address the questions below, somewhere within a two-page limit. The specific format of the proposal is up to you.
  - a. What motivates and inspires you to pursue your project idea?
  - b. What are the project goals and methods?

- c. What roles do observational ecology and discovery play in the project?
- d. What makes your approach unique, innovative, bold and/or risky?
- e. What is the timeline of completion for the specific elements to be aided by this fund and the entire project?
- f. What scholarly products will result from the research?
- g. What creative impacts or products will result from the research?
- h. How might your work inspire new ways of viewing the world over the longer term?

Please note that the proposal should be clear and accessible for a broad audience of ecologists; jargon should be avoided. A list of references cited and any figures or tables are NOT included in the two-page limit. Applicants should also submit:

3. A line-item budget and brief budget justification that outlines how the grant funds will be used.
4. A curriculum vitae of the applicant's academic background. Please do not send reprints.
5. A list of current and pending financial support for all projects that the applicant is involved with.
6. One letter of recommendation from the applicant's research advisor. Letter must be emailed separately by the advisor and received by the application deadline (Email to: [apply@rafeinnovativeecologyfund.org](mailto:apply@rafeinnovativeecologyfund.org)). Please do not send additional letters of recommendation.

**ELECTRONIC SUBMISSIONS:** Applications must be submitted in PDF format as a single document that includes items #1–5 above.

Please entitle the document as: lastname\_firstname\_sagarin\_2017.pdf

Email to: [apply@rafeinnovativeecologyfund.org](mailto:apply@rafeinnovativeecologyfund.org)

**APPLICATION DEADLINE:** Completed applications must be received no later than 5:00 PM (PDT) on **August 15, 2018**. NO exceptions. Please apply early and avoid the deadline rush. Awards will be announced in early October 2018.
